ETH Kipu

About ETH Kipu Foundation

ETH Kipu is a nonprofit foundation focused on growing Ethereum across Latin America.

Our Areas of Work

ETH Kipu organizes its activities into four main areas that strengthen and amplify each other:

Education

We provide free education to the Latin American community about the Ethereum ecosystem, using sustainable and accessible formats.

ETH Latam

The leading Ethereum conference in Latin America, bringing together builders, developers, companies, and institutions to strengthen the Ethereum ecosystem in the region.

Kipu Impact

We build relationships with actors aligned with Ethereum across Latin America, identifying needs and opportunities, and advocating for a sustainable ecosystem.

Kipu Stakers

We support communities and individuals across Latin America in managing their own nodes, fostering decentralization and collaboration throughout the region.

 ethkipu.org/educacion

Education

Empowering through knowledge.

EDUCACIÓN

Education metrics

April - June 2025

Our goal is to strengthen Ethereum education across Latin America by focusing on fewer countries with deeper engagement, improving learning outcomes.

- **Cities:** 6 (Buenos Aires, Recife, Cochabamba, La Paz, Santa Cruz and San José)
- **Countries:** 4 (Argentina, Brazil, Bolivia and Costa Rica).
- **University partners:** 4
- **Total students:** 613
- **Contributors to Ethereum OSS:** 13
- **Graduates:** We expect 40% graduates. Some of these courses end at the end of July, others in mid-August, and others at the end of August.

Education metrics

April - June 2025

We currently have 613 students who have started the Ethereum Developer Pack:

In person:

- Costa Rica: 40
- La Paz: 46
- Cochabamba: 40
- Santa Cruz: 53
- Recife: 36

Virtual:

- Henry: 37
- Talento Tech AM: 157
- Talento Tech PM: 204

Universities

We've strengthened our Ethereum Developer Pack (EDP) by partnering with 4 universities in key cities across Latin America:

- **Cochabamba, Bolivia**
Universidad Católica Boliviana "San Pablo" (U.C.B)
- **La Paz, Bolivia**
Universidad Mayor de San Andrés (UMSA)
- **Santa Cruz, Bolivia**
Unifranz
- **San José, Costa Rica**
Universidad Cenfotec

Collaborations

We partnered with OnlyDust to connect our students with open source opportunities in the Ethereum ecosystem.

- We reinforced the value of hands-on learning through contributions to Ethereum projects: **96 students joined**, and **13 made their first contribution**.
- Through curated repositories and Spanish-language onboarding sessions, students learned how to contribute and build a public profile on GitHub.

OnlyDust

Education - Highlights

Juan Diego Vanegas

This graduate from Bogotá now works as a front-end and Solidity developer at an EVM-focused software factory.

Vinicius Ciscoto

This graduate from São Paulo now works as a blockchain developer at a BV Bank.

Maxi Roldan Capponi

He went from being a student to working with us as an instructor for the student internship course.

Guilherme Binsfeld

Graduate from São Paulo now works at a Web3 company helping businesses integrate blockchain.

Education - Highlights

Lorenzo Hardoy

He began as a student in the "Jardineros de lo Infinito" course, was one of the selected grantees, and will be this year's instructor. He has been a Kipu Explorer in the Kipu Stakers area for several months and was recently selected as a Customer Success Engineer at Obol.

Enti

He started as a Kipu Explorer, contributing value in the areas of Education and Kipu Stakers. He then began contributing to Lido and recently launched Vista, a dev shop that has contributed to projects like Obol and ApeChain.

Ministry of Education - Bs As City

The agreement with the Ministry of Education of the City of Buenos Aires continues to be a fundamental pillar for our Education department. Within the framework of the "Talento Tech" program, we have registered **more than 360 young people over the age of 18** for our **Ethereum Developer Pack course**, which is free, virtual, and synchronous.

This partnership also allowed us to launch a new internship for young people from public secondary schools in the City of Buenos Aires. During this internship, a team of nearly **30 students** from diverse backgrounds (ICT, Developers, Marketing) will, with the help of our mentors, develop a prototype of a blockchain-based solution aimed at solving a school problem they had previously identified.

Events

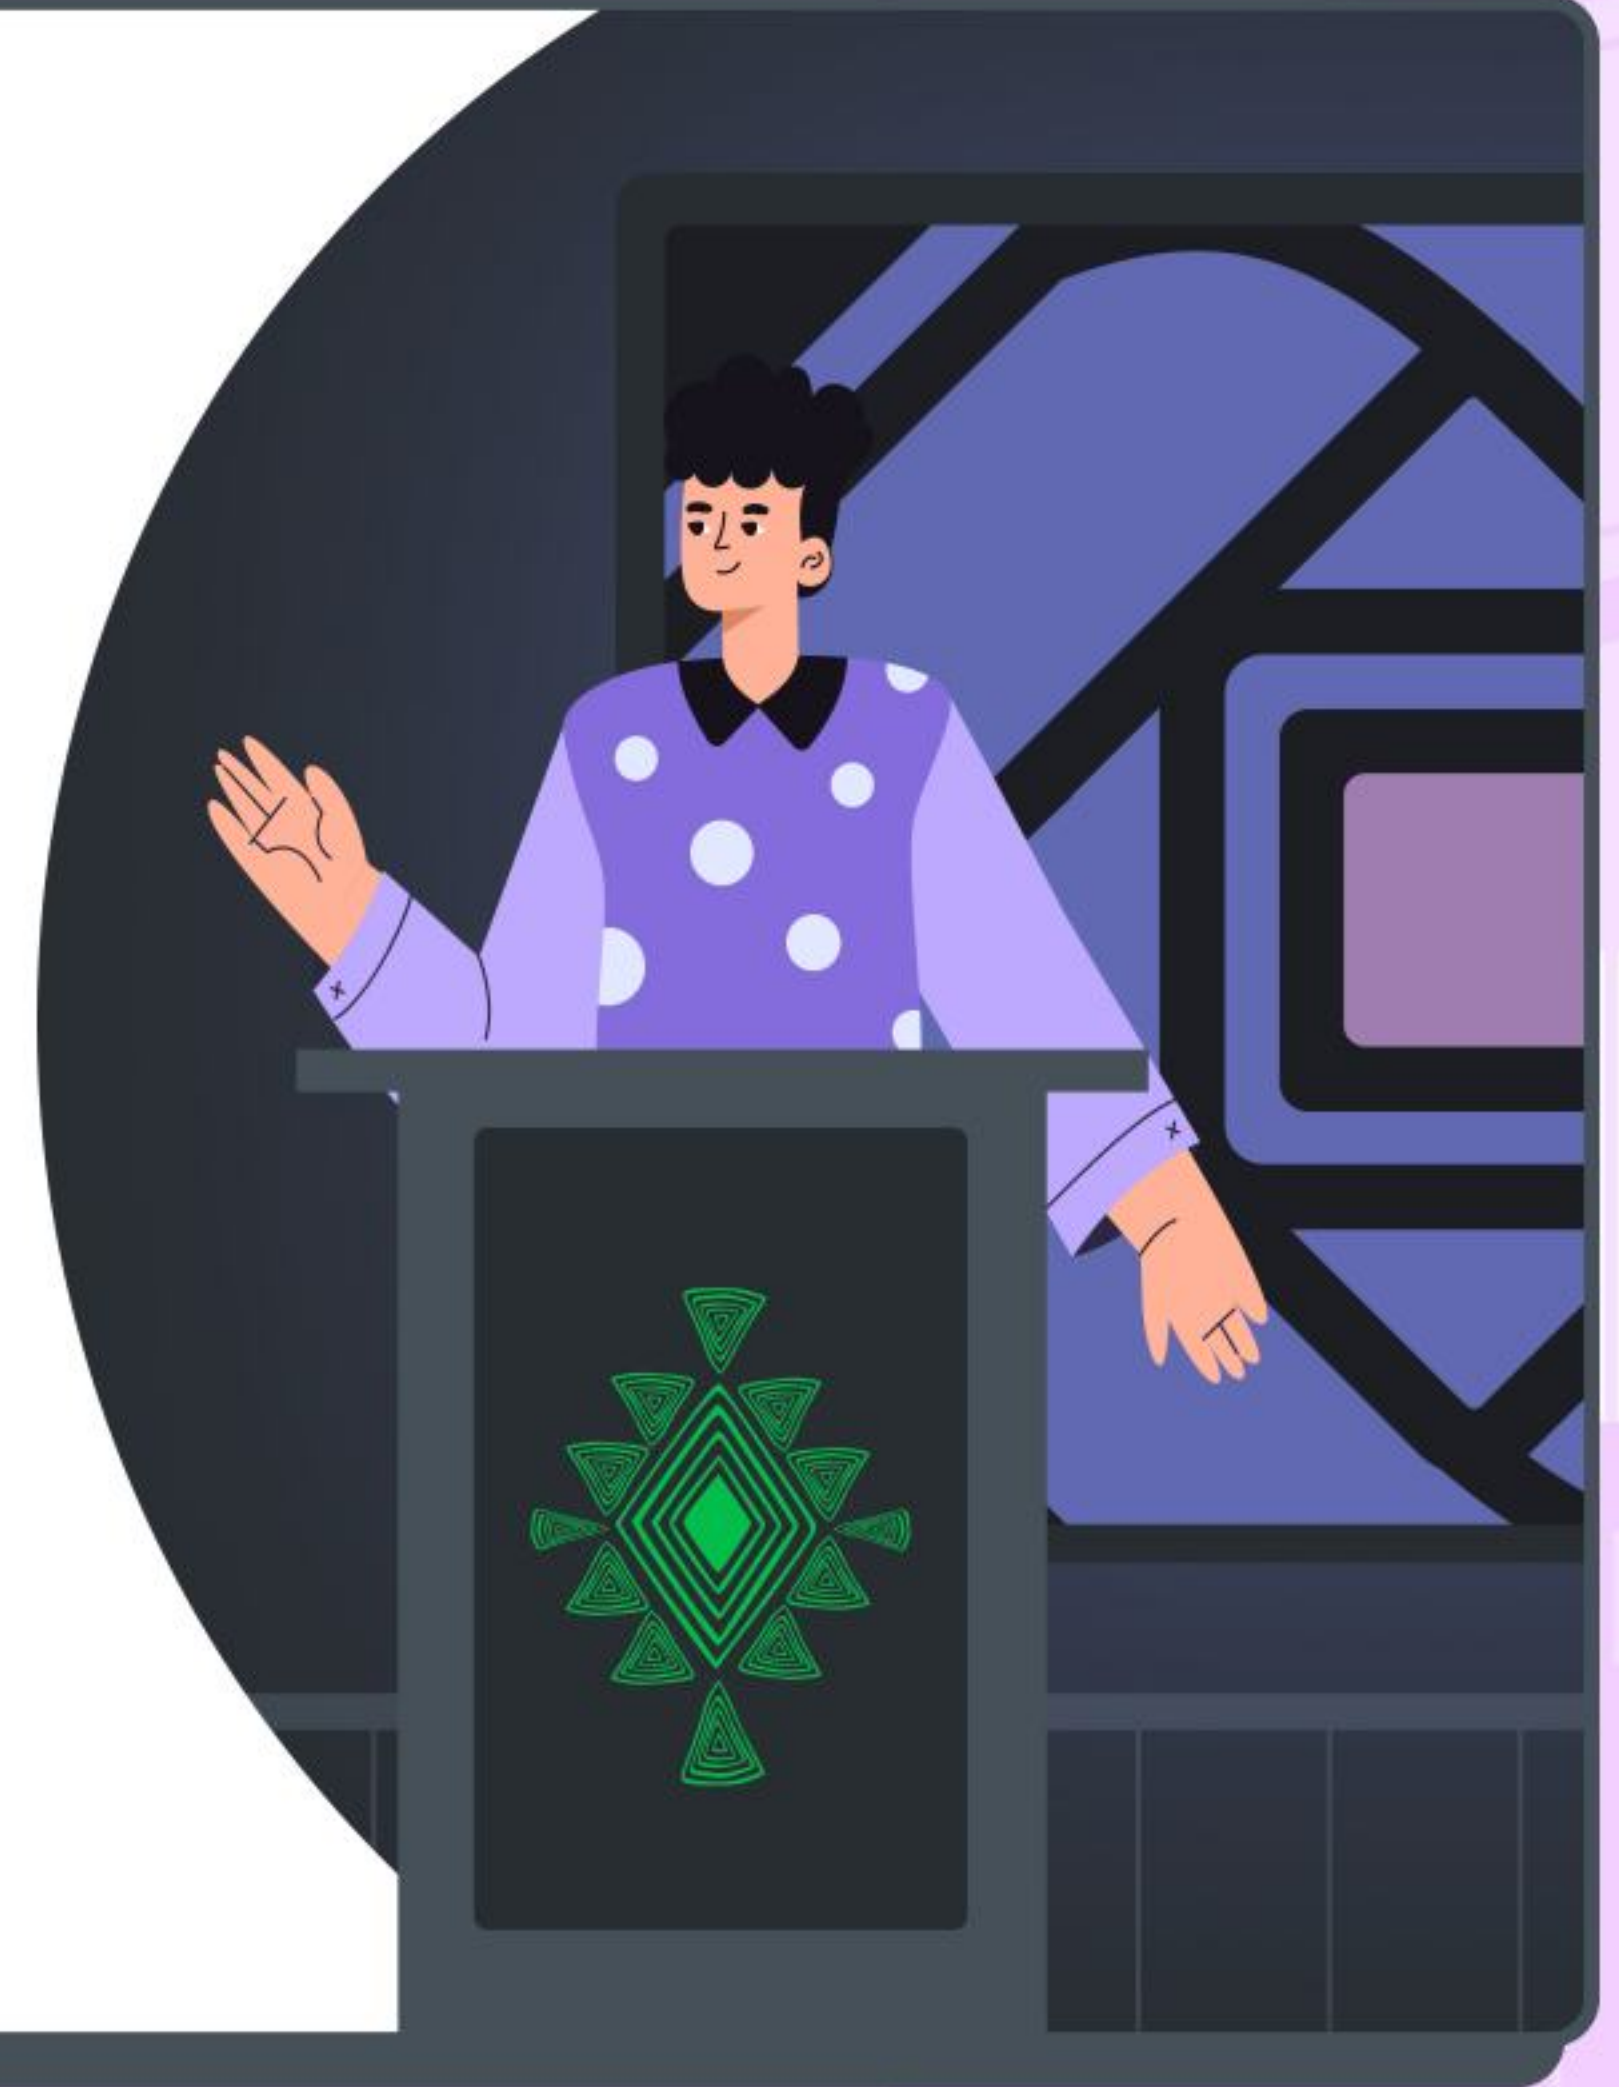

Forum “Blockchain & Universities”: we participated in the “Blockchain & Universities” Forum, organized by the Argentine Blockchain Foundation. We were part of the first panel, referring to the adoption of blockchain in Argentina and we also participated in a working table linked to blockchain in university management. **More than 120 people and 20 universities of all over the country attended the forum. This reinforces our position as a benchmark for Ethereum in the university environment and allowed us to obtain +10 leads to initiate conversations for possible courses.** [Post on X](#), [Post on X](#), [Recording](#).

We participated in “**Mar del Blockchain**”, an event that brings together the blockchain community in Mar del Plata, Argentina. **More than 130 people attended, and we received 18 pre-registrations for the Ethereum Developer Pack course**, which we will be offering in partnership with the National University of Mar del Plata and will begin in late August or early September. [Post on X](#).

 ethkipu.org/ethlatam

ETH Latam

Connecting the local with the global.

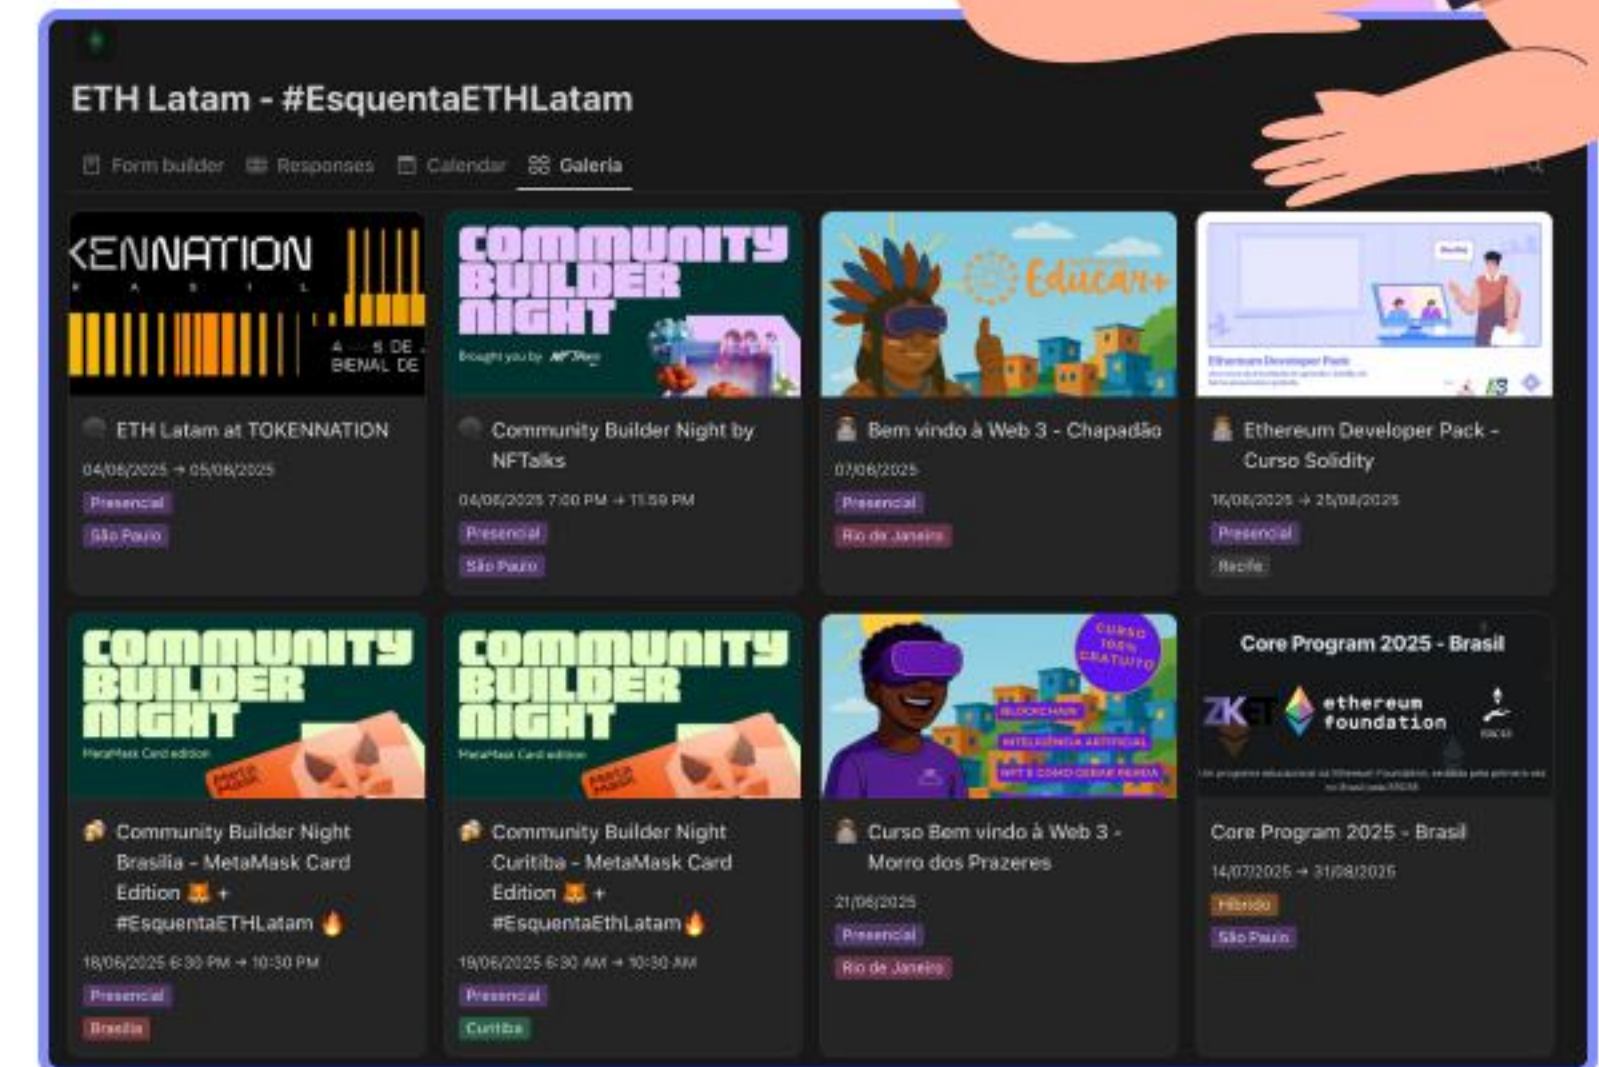

#EsquentaETHLatam

We started to push and participate in activities to prepare for ETH Latam Sao Paulo. In previous editions, we used **#RoadToETHLatam** for activities leading up to the conference.

For this 4th edition, we use a hashtag more connected to the Brazilian community: **#EsquentaETHLatam**. Some things we are encouraging:

- EDP and ESP
- Workshops
- Meetups & Events

#EsquentaETHLatam

One of our key alliances is with MetaMask app, with whom we partnered to host Community Builder Nights in:

- **São Paulo:** + 80 attendees
- **Brasilia:** + 30 attendees
- **Curitiba:** + 40 attendees

Kipu Impact

Fostering change from the root.

KIPU IMPACT

Kipu Impact Support Program (KISP)

Q2: 4 new grants awarded.

Brazil:

- **Brasilia:**
Rai Auad, #EsquentaETHLatam – Community Builder Night.
- **Curitiba:**
Lizzy Zanlutti, #EsquentaETHLatam – Community Builder Night.
- **São Paulo:**
Marcos Affonseca, #EsquentaETHLatam – TokenNation.

Kipu Impact Support Program (KISP)

Peru:

- **Lima:**
Edwin Fernández, dETHconomics Module 3.

dETHconomics is an educational program divided into specialized modules focused on Ethereum, Token Economy, Web3 Data Analysis, and, finally, the study of topics from the Robust Incentives Group.

The program is operated by DeFinomics Labs and APEECO (Peruvian Association of Economics Students). A pilot phase was developed in the last months of 2024, and Phase 2 took place in April 2025.

- **+290 students** enrolled in UETH.
- **+280 student** posts shared about their learning progress.
- **5 travel and accommodation** scholarships awarded for Ethereum Lima Day.

Kipu Impact Support Program (KISP)

Q2: 4 grants executed.

- **Tres de Febrero, Argentina:**
Workshop – Introduction to Blockchain.
- **Rio de Janeiro, Brasil:**
Série de workshops – Bem vindo a Web3.
- **CDMX, México:**
Latam Builders Report.
- **Lima, Perú:**
dETHconomics, Module 2.

In Q2, four grants were executed in Argentina, Brazil, Mexico, and Peru. Highlights include a blockchain workshop in Tres de Febrero to explore interest in the Ethereum Developer Pack, and community workshops in Morro dos Prazeres introducing Ethereum and connecting with local regenerative initiatives. In Mexico, the Latam Builders report was completed, offering regional insights.

In Peru, Edwin Fernández delivered Module 2 of dETHconomics, with over 290 students participating. These initiatives show the range of KISP: from education and research to grassroots activation.

 ethkipu.org/stakers

Kipu Stakers

Decentralization within everyone's reach.

KIPU STAKERS

Kipu Stakers metrics

We have led our grantees in the creation of two DVT clusters. These clusters are running on the Hoodi testnet.

This type of hands-on experience directly contributes to staking practices, accelerating technology adoption and confidence in its use.

- 8 grantees of “Jardineros de lo Infinito”.
- 2 DVT Clusters.
- 8 cities connected (4 in each cluster).

Mart - Student and grantee of “Jardineros de lo Infinito”

Kipu Stakers metrics

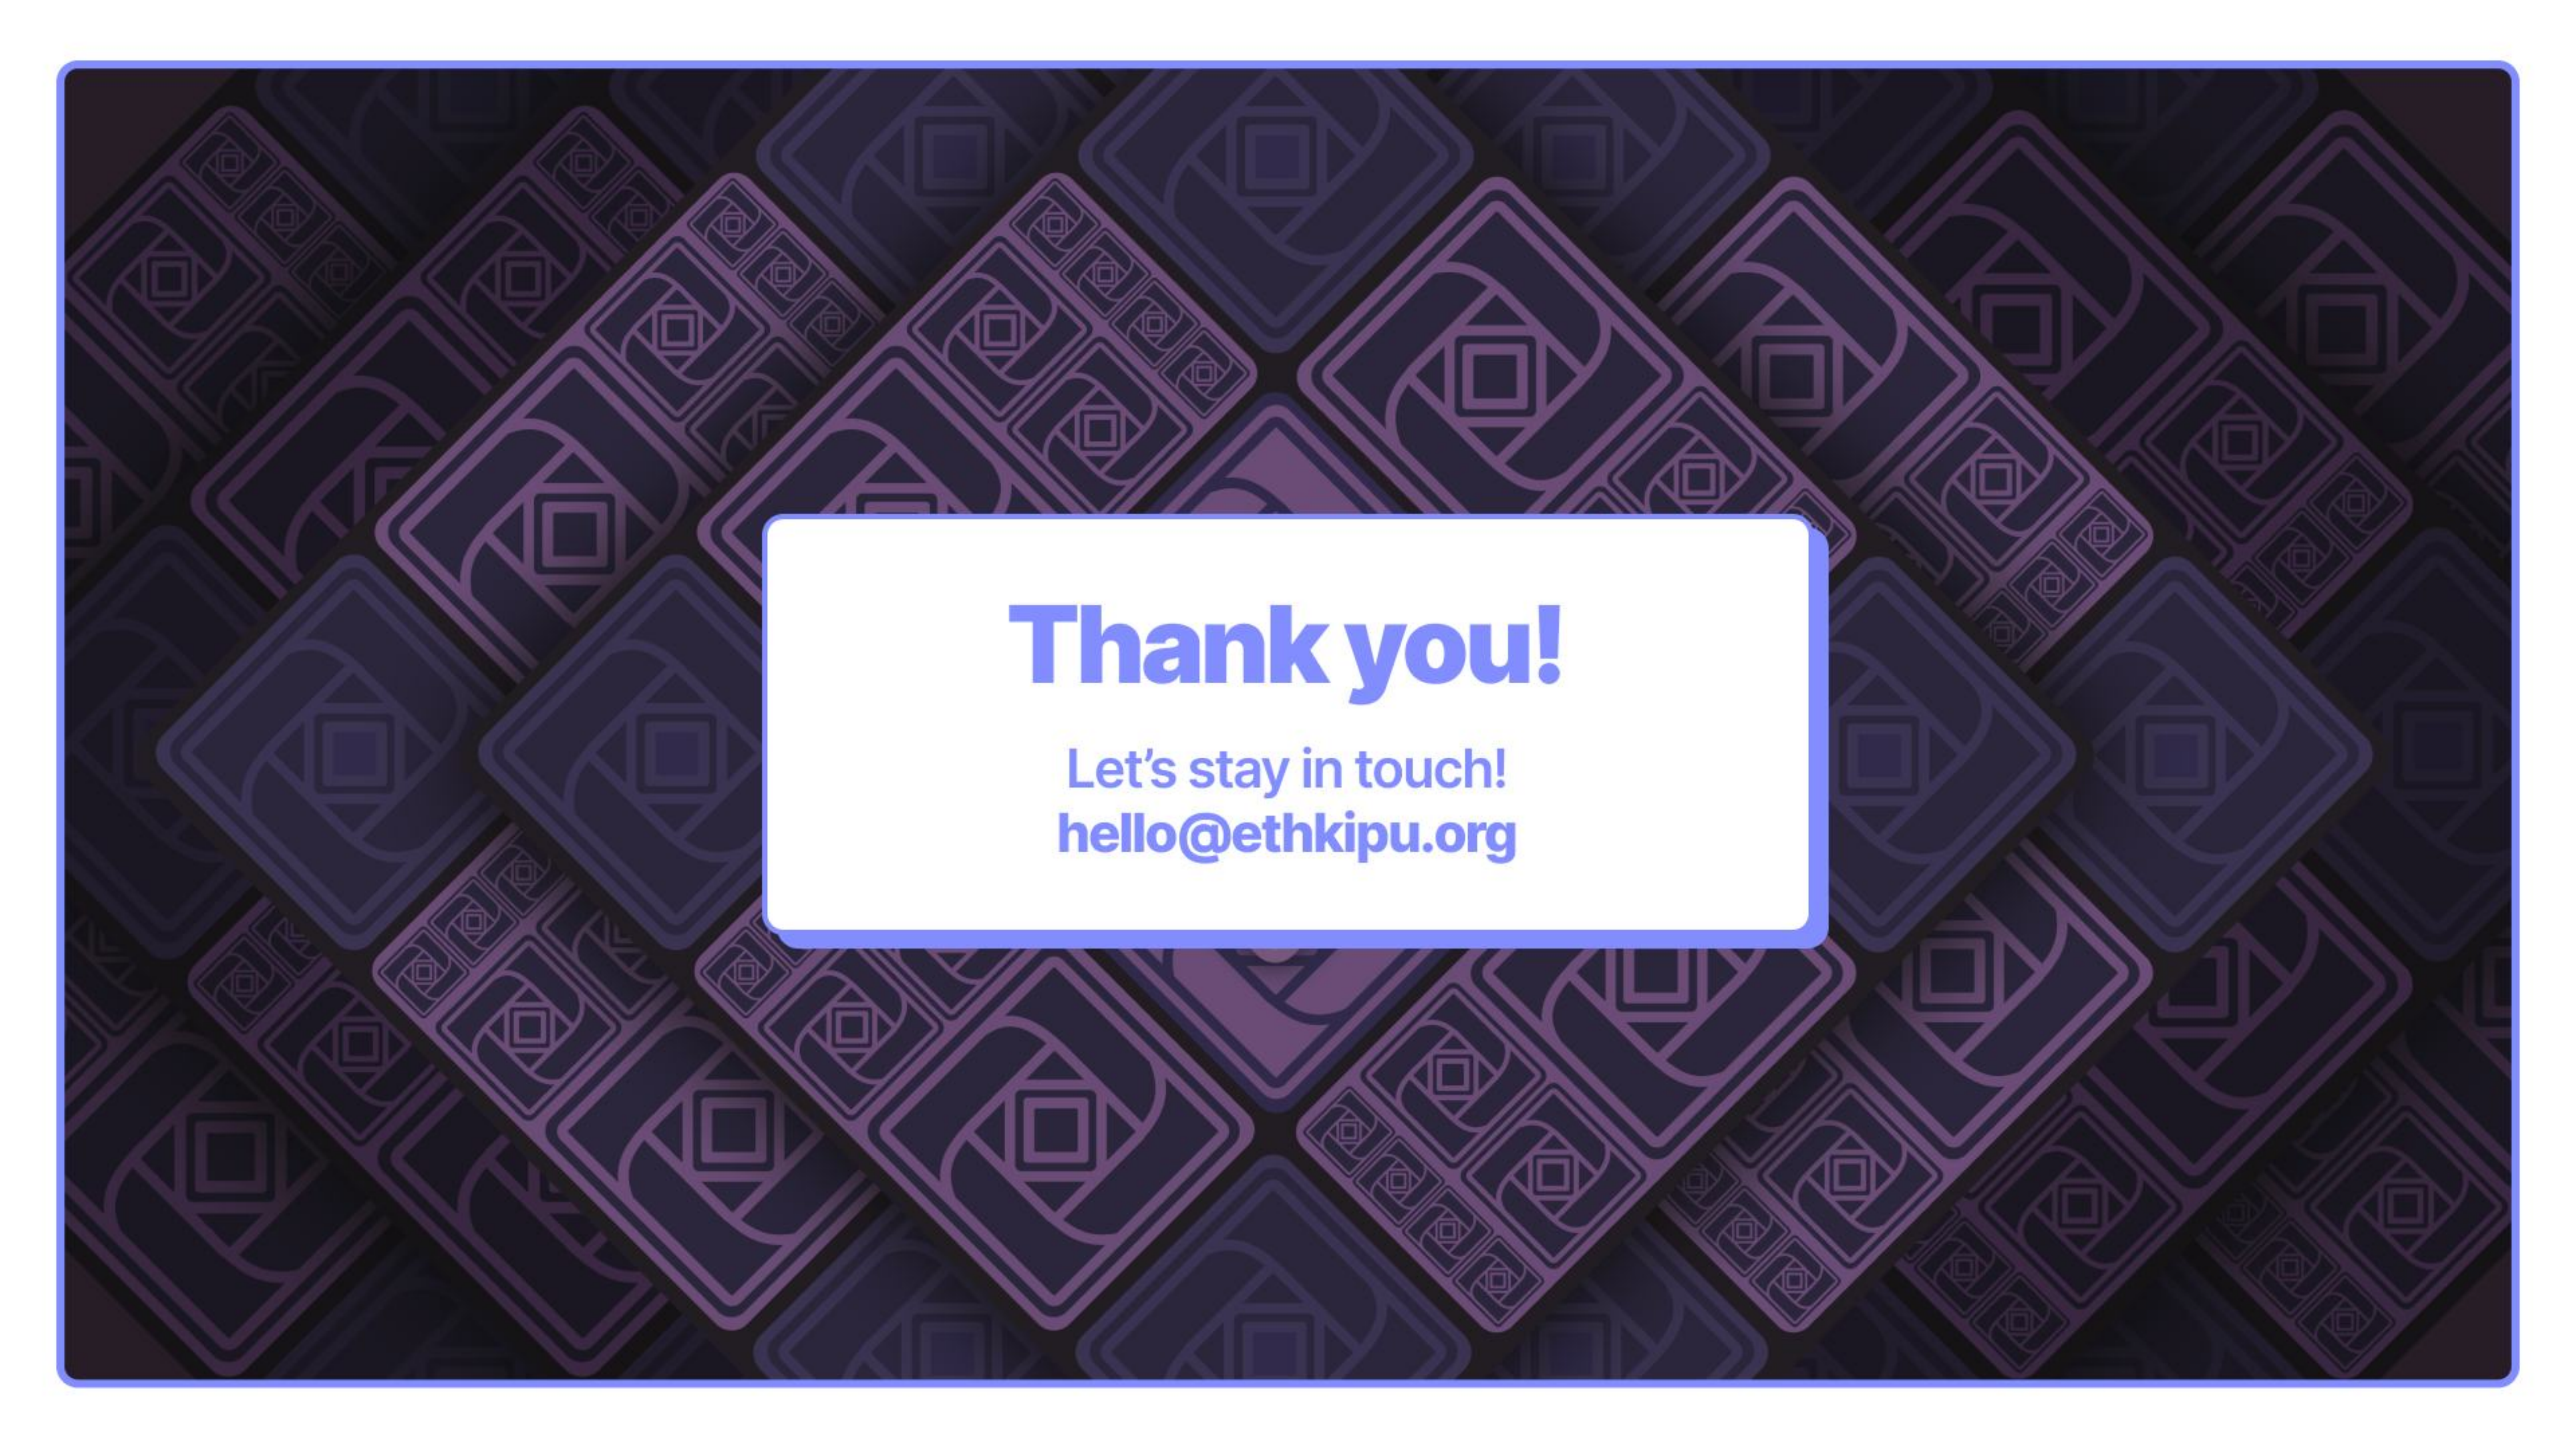

Cluster #1

4 grantees, located in Veracruz (México), Salamá (Guatemala), San José (Costa Rica) and Entre Ríos (Argentina).

Clúster #2

4 grantees, located in Quito (Ecuador) and Lima (Perú).

Thank you!

Let's stay in touch!
